Education

UNAN-LEÓN

Information Systems Engineering

León, Nicaragua

Mar 2021 – Nov 2025

Technical specialization in the software development lifecycle and network infrastructure administration. Focused on creating scalable solutions and optimizing connectivity.

Experience

Software Developer

UNAN-LEÓN

León, Nicaragua

Jul 2025 - Dec 2025

- Developed UI components with React and robust services in PHP, ensuring fluid and secure communication through RESTful API consumption.
- Implemented optimization strategies that reduced load times in internal systems, improving operational efficiency for academic and administrative processes.
- Identified and corrected critical bugs in production environments, ensuring service continuity and database integrity.
- Designed and implemented responsive interfaces following UX/UI standards, increasing system accessibility for a diverse, multi-device university community.

Software Developer

NetflixBpo LLC

Remote

Jan 2025 - Present

- Translated complex UI/UX designs into high-performance components in Next.js, guaranteeing faithful implementation and optimized user experience.
- Led critical API integrations between frontend and backend services to enable advanced AI-assisted vehicle inspection capabilities.
- Implemented a secure payment gateway using Stripe, facilitating reliable transactions and optimizing conversion flow within the platform.
- Developed strategic integrations for image processing services and AI models, enabling automated diagnostics in a comprehensive Autotech solution.

Projects

SUMMA

Aug 2025 - Nov 2025

Inclusive job portal for people with disabilities.

- Developed an inclusive job portal to connect talent with disabilities with socially responsible companies, prioritizing WCAG 2.1 accessibility standards.
- Implemented an intelligent matching system that links candidate profiles to vacancies based on both skills and required support tools or workstation adaptations.
- Integrated AI APIs to optimize user experience (UX), enabling job searching through natural language processing (NLP) via text and voice.

Skills

Technologies: Next.js, Spring Boot, Laravel, Nest.js, Express.js, Python, Gin, Docker, REST APIs, GraphQL, AWS

Others: Git/GitHub, Visual Studio Code, MongoDB, MySQL, PostgreSQL, Postman, DataGrip

Languages: English (fluent), Spanish (native)
